- Formation of professional competences relating to future occupation

INCLUSIVENESS

- Taking into account all specific features of the educational process participants

SATURATION

- Relevance and completeness of information resources

MULTIMEDIA

- Use of various means and forms of information presentation

FLEXIBILITY

- Regular control and updating of the educational process

KEY COMPONENTS OF DIGITAL UNIVERSITY

PERSONNEL

**INFORMATION
RESOURCES**

INFRASTRUCTURE

more than 400
PhDs,
associate
professors

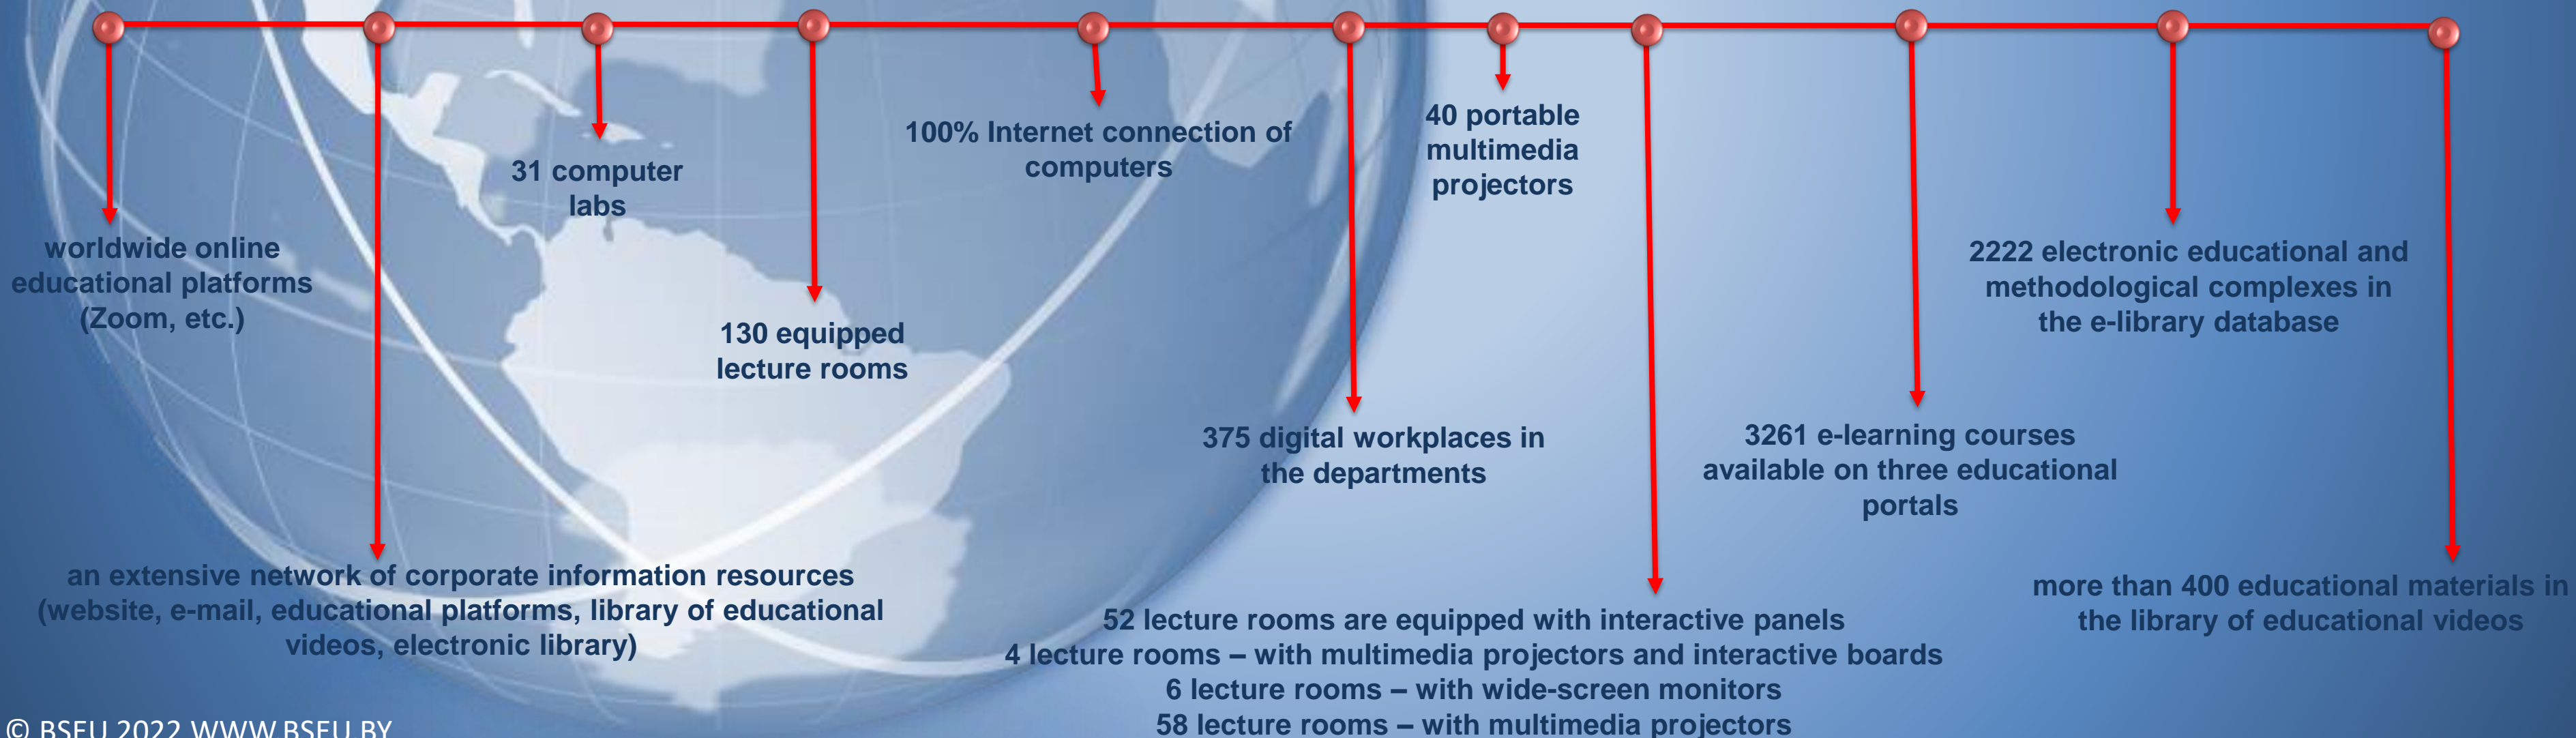

about 70
doctors,
professors

use of ICTs in
the educational
process

constant
professional
development of
the teaching
staff

- server equipment (hyperconverged cluster of 3 physical servers)
- 200 Mbit/sec – speed of Internet access
- 23 Wi-Fi hotspots
- about 1000 printers, MFDs, copiers
- 70 switchboards, 2 routers

Digital transformation capacity of BSEU

Digital infrastructure of the university

Server system for storing and transferring information

More than 1500 PCs connected to the local and corporate network

Computer equipment, interactive panels, videoconferencing equipment, multimedia projectors

Digitalized department working places

Computer equipped lecture rooms

Recording studio for broadcasts, lectures, and online courses for professors

Digital learning environment

Information resources

Electronic scientific library

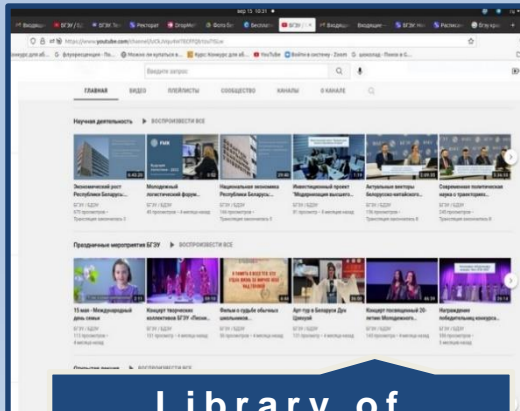

Faculty e-resources

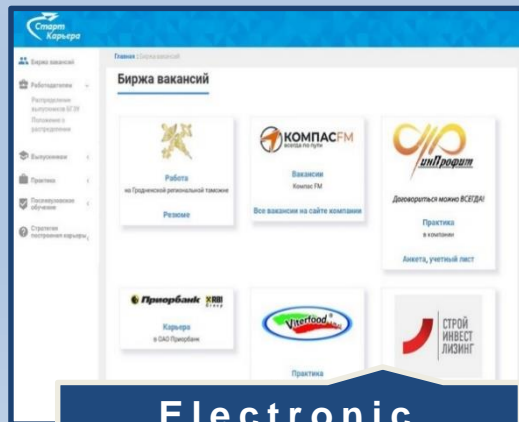

BSEU student's profile

E-learning courses

Library of educational video materials

Electronic vacancy exchange

- ❑ Information resources generated in-house:
 - Electronic catalogue** with online access. Total number of bibliographic records – about **730000**
 - Electronic library** contains about 62000 full-text documents (Electronic educational and methodical complexes, abstracts of theses, articles, conference materials etc.)
- ❑ More than **20** full-text databases of world-known aggregators, information portals and electronic periodicals
- ❑ Fulfillment of information requests for electronic delivery of documents from electronic library collections
- ❑ Integrated plug-ins of Lun and Znanium.com into BSEU educational portal
- ❑ Reading rooms with free Wi-Fi access

100 % OF EDUCATIONAL MATERIALS ARE AVAILABLE TO EVERY STUDENT WORLDWIDE

BSEU EDUCATIONAL PORTALS

elearning.bseu.by

- for all educational programs of BSEU (common and advanced education)

test.bseu.by

- for educational programs of part-time education

i.bseu.by

- e-learning courses for distance learning students

open.bseu.by

- for career guidance work with high school and secondary school students

Prospective trends in university digitalization for 2022/2023

Developing and upgrading of BSEU information and communication infrastructure, material and technical base strengthening

- Providing stable hardware and software access to information systems and digital information resources of BSEU

Providing measures for digitized personal data protection and security of electronic information resources of BSEU

- Providing up-to-date electronic educational content, increasing the number of scientific and educational editions in BSEU e-library
