ENGLISH LEARNING ONLINE DURING SELF-INSULATION

Изучение английского языка на самоизоляции*

The theme of my research work is “English learning online during self-insulation”. I try to answer the question: Is it possible to continue learning English on your own, without losing the quality and level of study?

The subject of the research is the Internet resources for self-studying English.

The aim of the work is to define what useful sites for learning English exist.

The objectives are the following:

1. To identify the pros and cons of using the Internet for learning English.
2. To find out the most popular resources.
3. To carry out the questioning among the students of our university and the students in Britain.

The methods of the research applied in the work are the following: collecting of the practical material, the comparative analysis, tabulation.

The actuality is connected with the fact that during the pandemic it was impossible to attend courses. But I want to show that we can improve our level of English independently. Unfortunately, few people know about all the great opportunities that the Internet provides. In our work we mentioned only absolutely or at least partly free resources where you can learn English.
